[3] Waste (WS)

[3.7] Total volume organic waste treated this year

Type of waste	Amuount (ton)					
	Produced		reduced	Treated		
	2024	2025		reused	down-cycled	up-cycled
Organic	160	145	15	42	72	31
Food waste	70	65	5	20	30	15
Green waste (leaves, plants, etc.)	70	65	5	14	36	15
Others	20	15	5	8	6	1

Description:

In 2025, 145 tons of organic waste in total were produced at our university. Of this, 100% of the green waste, such as leaves and plant materials are treated by converting them into fertilizers to improve soil quality or purchased by local farms as a animal feed. Good-quality food waste is provided to community members who raise animals. The rest of the food waste is either composted or turned into fertilizer, while the non-recyclable portion is managed by the local waste management company “Navoi Stimuli”.
